

K. Satya Sampath Kumar

Web Product Designer — UI/UX

satyasampath79@gmail.com | +91 9550736570 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Profile

Computer Science student focused on web product design and user experience, with hands-on experience taking web products from Figma wireframes and interactive prototypes to responsive production interfaces. Designed a client-facing website through stakeholder feedback and iteration, and built reusable UI components, responsive layouts, and interaction flows across web projects. Comfortable collaborating across design and development to turn user and business requirements into clear, consistent digital experiences.

Design & Technical Skills

Design: Figma (wireframing, prototyping, UI design), Responsive Web Design, Interaction Design, Design Systems, Component Design & Reuse, UX Writing, User Feedback & Iteration, Cross-Browser QA

Frontend: React, HTML, CSS, Tailwind CSS

Tools: Git, GitHub, VS Code, Vercel, Render, Cloudflare

Relevant Experience

Web Design & Frontend Development Intern | SLS Structo-Mech Consultants Jul 2026 – Present
[slsnexus.com](#) — [GitHub](#)

- Designed a customer-facing engineering website in Figma, creating wireframes, page layouts, visual styles, and reusable UI components; presented mockups directly to the client and iterated based on stakeholder feedback.
- Translated approved designs into a responsive production website, maintaining visual consistency and usability across desktop, tablet, and mobile breakpoints.
- Designed an internal admin dashboard with reusable components and clear status states (New, To Do, Replied), improving information clarity for non-technical users.
- Designed the contact-form interaction flow and UX messaging, including submission feedback and confirmation states to create a clearer user experience.
- Performed cross-browser and responsive QA while refining the interface to ensure consistent behavior and visual fidelity across devices.

AI Virtual Internship – PolicyNav | Infosys Springboard Aug 2025 – Oct 2025
[GitHub](#)

- Designed a simplified Streamlit interface for non-expert users, organizing dense public-policy information into a clearer search and retrieval experience with emphasis on readability and information hierarchy.
- Built the semantic-search pipeline using PDF parsing, chunking, vector embeddings, Ollama, and ChromaDB to support the interface.

Projects

Interview AI Platform [GitHub](#) — [Live Demo](#)

- Designed the end-to-end user flow for resume upload, question generation, interview results, and report screens, focusing on reducing cognitive load and creating a clear candidate experience.
- Built the responsive React interface using a consistent visual system and reusable components, with backend integration through Node.js, Express.js, and MongoDB Atlas.

QuizHub – Interactive Quiz Platform [GitHub](#) — [Live Demo](#)

- Designed a role-based product experience with distinct student and teacher flows – quiz-taking with instant per-question feedback, and an admin dashboard for quiz creation and results review.
- Built a small design system in CSS (layout, components, status badges, transitions) and designed the quiz-builder UI with live field validation to prevent incomplete submissions.

Education

Bachelor of Technology in Computer Science Engineering 2023 – 2027
Gandhi Institute of Technology and Management (GITAM), Visakhapatnam **CGPA: 8.2**

Achievements & Activities

- Gitathon Hackathon** – collaborated in a four-member team to recreate the GitHub interface, focusing on responsive layouts, visual consistency, and UI implementation.
- Active volunteer, **National Service Scheme (NSS)**, contributing to community development initiatives.
